nebraska’s learning acceleration series

session materials & resources
Nebraska’s Framework for School Renewal and Acceleration establishes high expectations for teaching and learning and supports educators in addressing unfinished learning for students through a proactive plan to achieve renewal and acceleration instruction in the coming calendar year and into next school year. This means help for schools to ensure that students have access to the grade-appropriate assignments, strong instruction, deep engagement, and teachers with high expectations.

In light of unfinished learning, The Nebraska Department of Education, in partnership with TNTP, offered an 8-session professional learning series based on Nebraska’s Framework for School Renewal and Acceleration and TNTP’s Learning Acceleration Guide, which supports systems and school leaders in rejecting the typical approach to remediation in favor of a better approach: acceleration. This is not providing content or teaching faster; rather, it is using instructional strategies that can help all students grapple with grade-appropriate content with just-in-time supports.

If you missed a session, or you want to learn more about a particular topic, recordings and corresponding materials are available on the Launch Nebraska website at [https://www.launchne.com/professional-learning-and-resources/](https://www.launchne.com/professional-learning-and-resources/). For additional support, please contact Cory Epler (cory.epler@nebraska.gov) or Chris Henderson (christopher.henderson@tntp.org).
